

Jerad Langille

Is there a particular heading under which dealing with the escalating crime rate (particularly downtown) is covered? I wasn't able to find anything specific, but acknowledge that it could be under a more broad heading.

City of Courtenay

Jerad Langille the draft 2023-2026 Strategic Priorities include a Public Safety category, prioritizing the development of a broad view of community safety to include protective services, RCMP, fire services, bylaw enforcement, pedestrian safety, and traffic planning. In the downtown specifically, last month Courtenay Council passed a motion to request that staff explore options for a Downtown Community Safety Office, and report these options back to Council.

City of Courtenay OK, thanks.

If you're looking for feedback this should probably be its own category and it would be nice to see some deliverables that aren't just reports. Mixing it in with pedestrian traffic safety and traffic planning seems like it might get lost in discussions of bike lanes and pedestrian bridges - and it definitely needs dedicated and rapid attention.
